

Roberto Galeano

Senior iOS / Mobile Engineer | Mobile Architect | Technical Lead

Toronto, ON | (647) 453-3041 | me@rgaleano.com | galeanosoftware.com/profile | linkedin.com/in/roberto-galeano

PROFESSIONAL SUMMARY

Mobile architect and senior iOS engineer with 20+ years designing and delivering scalable, multithreaded applications for banking, media, retail, and wellness clients. Expert in modern Swift, SwiftUI, Swift Concurrency, and Model-View-ViewModel (MVVM) architecture, with cross-platform delivery via Kotlin Multiplatform (KMP). Hands-on technical lead who defines feature specifications and reusable component systems across iOS, Android, Web, and connected-TV clients. Drives architectural standards, code quality, and cross-functional delivery, and applies AI-augmented development workflows to ship faster. Fluently bilingual in English and Spanish.

CORE SKILLS

Languages: Swift, SwiftUI, Objective-C, Kotlin Multiplatform (KMP), TypeScript

Architecture & Patterns: Mobile Architecture, Model-View-ViewModel (MVVM), Protocol-Oriented Programming, Swift Concurrency, Design Patterns, Refactoring, Performance Tuning

iOS Frameworks & Tools: UIKit, SwiftUI, XCTest, Xcode Instruments, Multithreading, Reusable Component Systems

Leadership: Technical Leadership, Solution Architecture, Specification Authoring, Code Review, Cross-Functional Coordination, Estimation, Technical Documentation

AI-Augmented Development: Claude Code, Claude Cowork (AI-assisted specification, code review, and coordination)

Tooling: Xcode, Android Studio, Git, GitHub, GitLab, Jira, Confluence, Figma, Lucidchart

Databases: MySQL, PostgreSQL, Oracle, Firebase (database design and optimization)

Platforms: iOS, macOS, Linux / Unix, Smart TV and Set-Top-Box clients

PROFESSIONAL EXPERIENCE

Independent consultant since 2008, delivering senior mobile engineering and architecture for the clients below.

Client Platforms Architect, Telus TV+ (Streaming / Media)

November 2025 - May 2026

- Architected feature specifications across Smart TV, set-top box, Apple, Android, and Web clients, ensuring consistent behavior across a multi-platform streaming ecosystem.
- Established auditing processes for existing features and coordinated delivery with product owners and cross-functional stakeholders.
- Drove AI-augmented workflows with Claude Code and Claude Cowork to accelerate specification, code review, and team coordination.

iOS Developer, CIBC via Jarvis Consulting Group (Banking)

August 2024 - December 2024

- Built UI components and supporting service layers for the CIBC US mobile banking app on a shared iOS / Kotlin Multiplatform codebase.
- Delivered against functional and non-functional specifications using SwiftUI, Swift Concurrency, and MVVM.

Mobile Engineer, Audible via TEEMA (Audiobooks / Amazon)

June 2022 - June 2023

- Generated cross-platform Software Development Kits (SDKs) for iOS and Android by translating wiki specifications into TypeScript for an internal metrics factory.
- Integrated analytics and metrics across native iOS and Android clients with full unit-test coverage.

iOS Engineer, Paceline via Teamit (Wellness-Oriented Fintech)

July 2021 - June 2022

- Architected and shipped activity calendar, badges, and reward-tracker screens plus reusable widgets for the iOS app.
- Built a developer screen catalog and integrated Amazon direct rewards using UIKit, SwiftUI, XCTest, and Protocol-Oriented design.

Lead iOS Developer / Solutions Architect, Clearbridge Mobile (Full-Stack Mobile Development)

January 2020 - June 2021

- Led iOS architecture and delivery for Sculpture Hospitality, defining reusable UI components and layouts across the app.
- As Solutions Architect on the Bell.ca portfolio, resolved complex native/web integration issues (cookie management, WebKit bridging) and authored technical documentation that kept stakeholders aligned.

iOS Consultant, Audible via ATIMI (Audiobooks / Amazon)

April 2019 - October 2019

- Refactored the Library tab and Core App Layer of the Audible iOS app; fixed defects and shipped new features in Objective-C and Swift.

EARLIER EXPERIENCE

- **Mobile Architect, Clearbridge Mobile (2017-2018):** Led iOS and Android delivery across Chatr, Alectra, Aspire Music, TreadMarks, and BlueDiamond; supported Project Management Office (PMO) estimation and enforced code-quality standards.
- **iOS Consultant, Compass Digital Labs (2017):** Architected shared iOS frameworks and led development of the BONapp food-ordering app.
- **iOS Consultant, Razorfish / Publicis Sapient (2015-2017):** Built Walmart.ca retailer-app features and delivered the first native Swift version of the landing page.
